PROJECT

TraPlaCa (Training Placement and Career)
- Collaborated in the development of TraPlaCa, a platform connecting job seekers and company recruiters.
- Implemented features enabling job seekers to apply for companies, view candidate profiles, and access a wide range of resources including articles, video lectures, and local opportunities.
- Contributed to the development of a user-friendly interface and optimized user experience to facilitate seamless interaction between job seekers and recruiters.
- Orchestrated a comprehensive admin dashboard, harmonizing easy management.
- TechStack Used: HTML5, CSS3, JavaScript, Java, MySQL

AROMA HUB eCommerce Platform
- Crafted AROMA HUB, a sophisticated eCommerce platform for exquisite perfumes, using MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Orchestrated a modern and responsive design, ensuring a delightful fragrance exploration on every device.
- Wove an olfactory journey with secure user authentication, offering a personalized shopping experience through authentication and authorization layers.
- Curated an intuitive product catalog, adorned with advanced filtering and search functionalities, guiding users to their perfect scent.
- Engineered a seamless shopping cart and checkout process, transforming customer journeys into fragrant adventures.
- Infused trust with integrated payment gateways, enabling secure and convenient online transactions for fragrance enthusiasts.
- Orchestrated a comprehensive admin dashboard, harmonizing easy management of products, orders, and user data.
- Designed AROMA HUB with scalability in mind, ensuring a fragrant future with room for growth and increased user traffic.
- TechStack Used: HTML5, CSS3, Bootstrap, MERN, MongoDB
